

Woodhouse Projects is an entirely new and unique specialist service, providing practical support to hard landscaping specifiers and contractors.

This Marshalls specialist business has been set up to provide commissioning clients, specifiers and contractors with a support service that helps you take the concept design and turn it into a built reality.

We can offer you this free service if you have a project where products and finishes have been chosen from the Marshalls group.

Woodhouse Projects help take your design to the next stage, easing the transition from concept to reality. We aim to ensure that your design and our products are installed to the highest level of detail and quality.

We can support you in the following ten areas of your project.

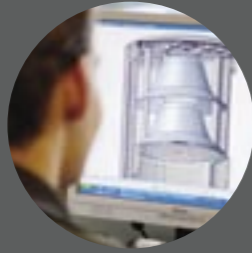

01

Project review with client design team

We work in close co-operation with both the specifier and contractor in order to provide a comprehensive review of a project's design & construction, in relation to the best use of Marshalls' products. Our team of architects, landscape architects, engineers and technicians will apply their expertise, inspiration and assistance to any technical queries you may have.

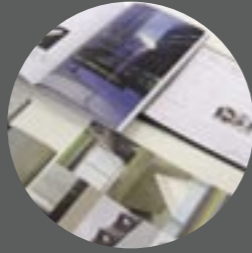

02

Detailed product knowledge

Marshalls' extensive portfolio of specialist hard landscaping products encompasses ranges of natural stone and concrete paving, traffic management systems, drainage & SuDS, street furniture, lighting, walling and associated items. Liaising with key client team members from project inception through to completion, our team will provide detailed information on every element required for a hard landscape scheme.

03

Advice on product selection

Marshalls plc carries the most comprehensive range of quality landscape and building materials for the construction industry in the UK. Our technical experts will guide you through the specific features and functions of every product, advising on issues such as comparative cost, suitability of materials, laying patterns and installation techniques.

04

Bespoke product development

WP is committed to promoting innovative design solutions across a vast range of landscape products for the public realm & we proactively design integrated ranges across all divisions. A technical detailing and CAD support service is also offered, in order to meet project-specific special requirements for products, and assist in the construction and tendering processes.

05

Project drawings and specifications

Fully referenced plans and 3D drawings are produced, suitable for presentation to clients or contractors, in order to illustrate the range of available solutions and possibilities. Practical and detailed construction drawings, including cross sections, are included in the offer, along with associated specifications and bills for incorporation into tender documentation.

06

Co-ordination of products and finishes

WP actively bring together the many divisions of Marshalls plc in order to provide a streamlined and fully integrated project support service. We strive to assure a high quality and aesthetically appealing conclusion to every project through this holistic approach.

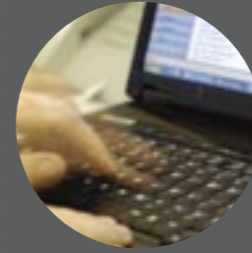

07

Site installation programmes

Working in partnership with the specifier and contractor, WP become an integral member of the design process, helping to deliver the concept into reality. Fully referenced plans and documentation are provided, along with comprehensive installation guidance, in order to resolve all project implementation issues before construction commences on site.

08

Budget costs

Cost breakdowns and estimates of product requirements allow finance models to be developed and considered as part of the design process. The aesthetic and functional requirements of a project are weighed up in order to offer the best value solution for overall performance, and alternative proposals are offered where feasible.

09

Project management support during the construction period

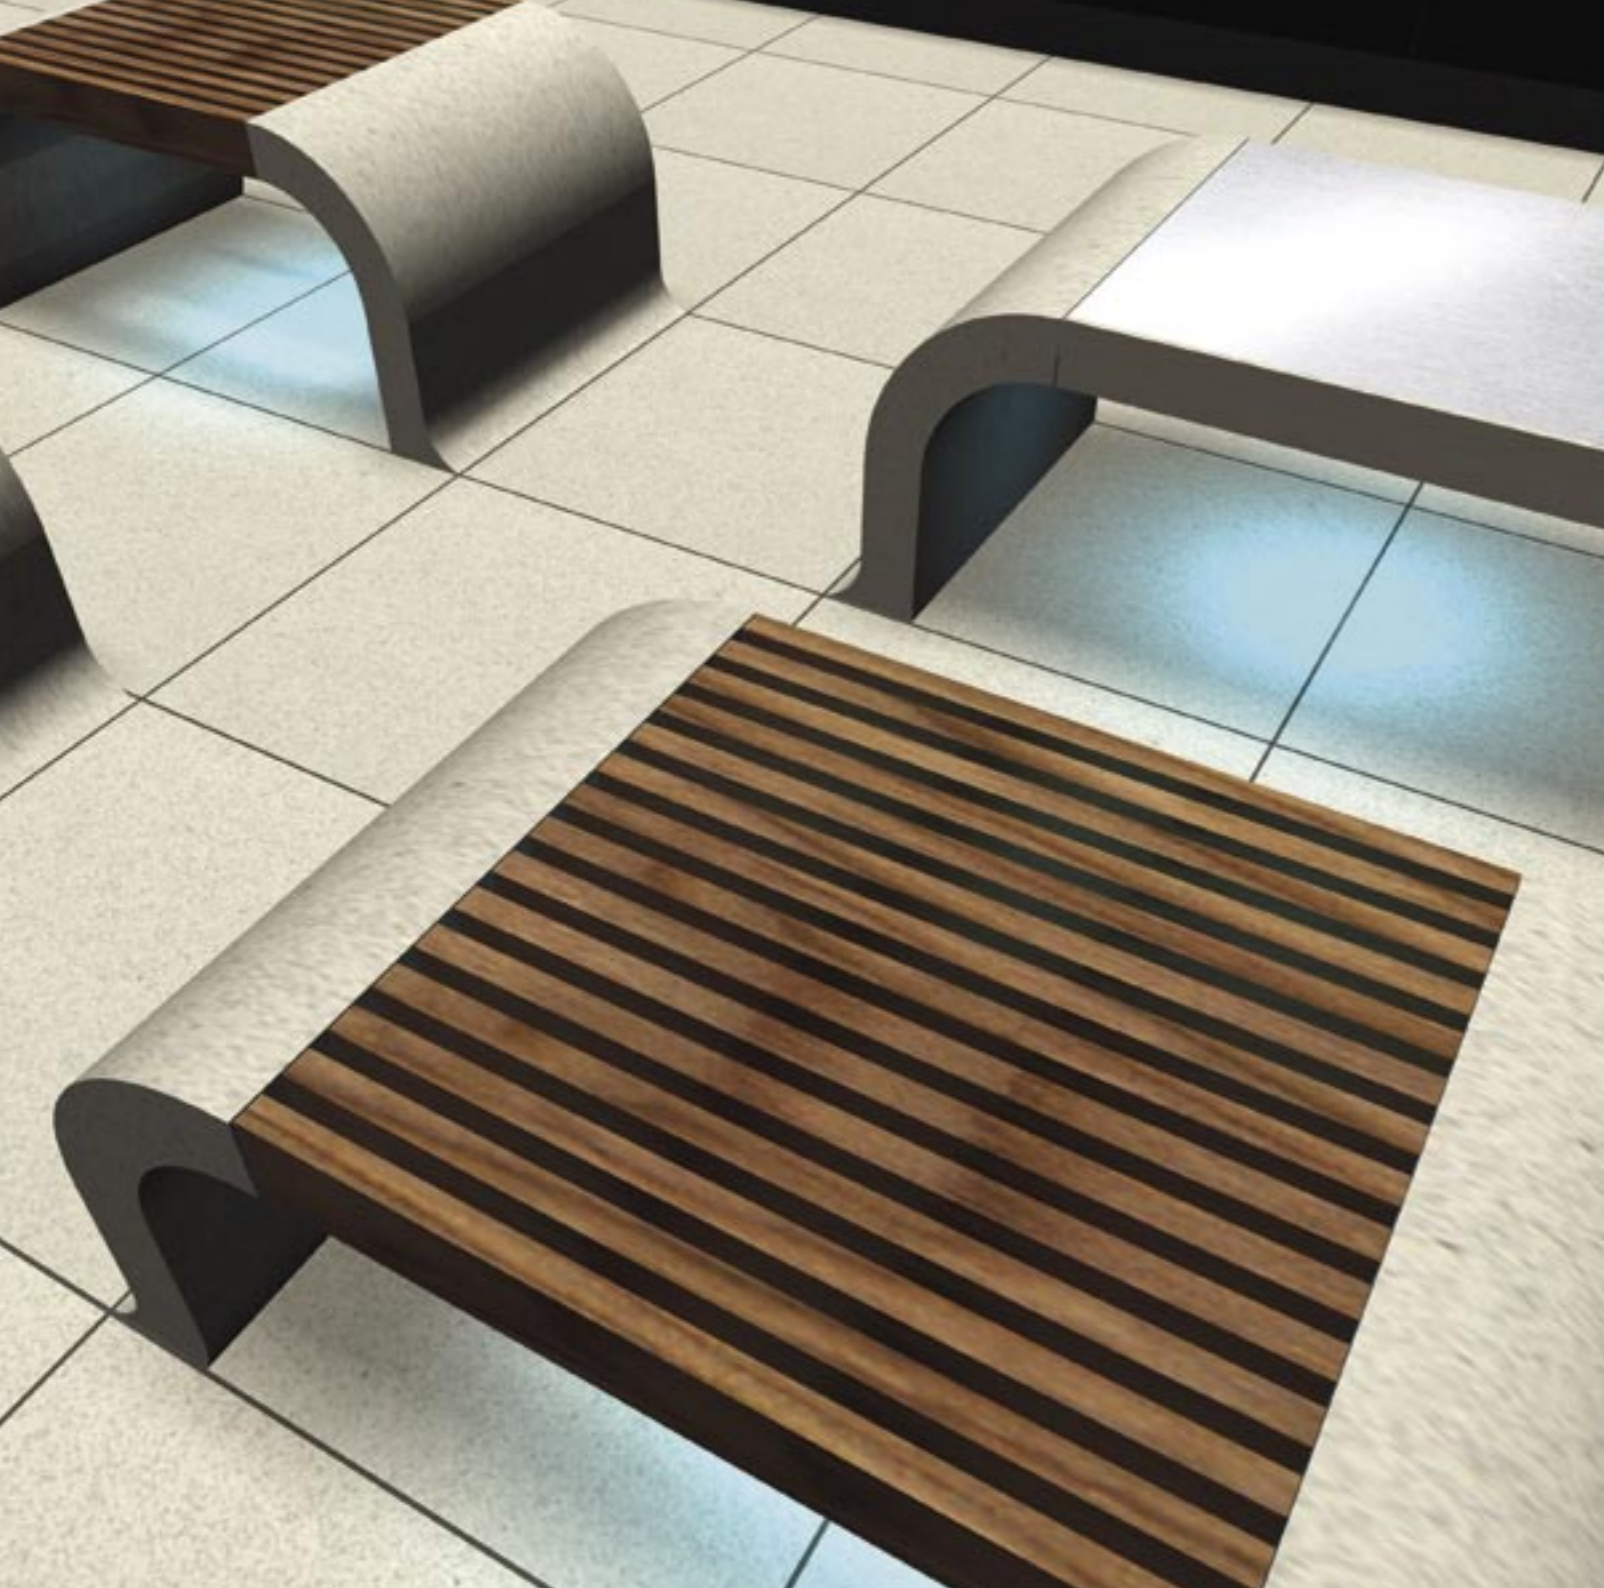

WP offer a seamless link between Marshalls plc and the project construction team, creating a clear and direct link between the divisional sales, technical and production functions. The team ensure an open dialogue is maintained throughout the build and take control of all logistics, problem-solving and invoicing.

10

After sales support

Maintenance regimes are available for all projects in order to ensure that product durability and long-term aesthetics are maximised. In addition, WP is able to offer an extended product warranty on projects that are managed throughout the entire design and build process.

To offer you additional support, we actively monitor developments in new technology and innovation across many sectors including, intelligent streets, solar power, interactive technology, renewable resources and much more.

We use this knowledge to support you in your concept development and to develop innovative products to add to our existing ranges.
